

Size limitations for vehicles in the exhibit hall:

- Vehicle weight would have to be approved by the hotel
- Vehicles have to enter two garage doors that are 8ft x 8ft. Once you are through the first garage door, you have a turning radius of about 17ft. At the second garage door, you have a turning radius of about 12ft.

All vehicles must...

- 1/8 tank of gas or less
- battery must be disconnected
- rubber wheels
- must be parked over vesqueen

The engineering department believes any vehicle that is more than 6ft wide and more than 11ft long cannot be accommodated. However, there is a parking lot just outside the ballroom that can be blocked off specifically for IABTI purposes.

The Resort reserve all rights to refuse any vehicle in the ballroom if we see fit and all vehicles must be pre-approved before entering the property.
